

HOW TO ENHANCE SUCCESSFUL USER ADOPTION OF MICROSOFT SHAREPOINT USING OUTLOOK

Features & Benefits of AI.SYNCPOINT - a cost effective Outlook extension which enables users to easily capture emails and attachments into SharePoint by drag and drop. It lets users find, view and edit SharePoint files within Outlook as well.

ORGANISATIONS HAVE AN EMAIL PROBLEM

For some organisations, emails can make up as much as 70% of their data estate. With AI.SYNCPOINT you can eliminate the need to repeatedly duplicate and share attachments reducing the load on email infrastructure, improving document control and ensuring compliance throughout your organisation.

ENABLES AN ENHANCED USER EXPERIENCE AND USER ADOPTION

Easy to deploy and easy to use solution enables enhanced user experience for document management which improves user adoption of SharePoint to help foster a culture of cloud collaboration.

FEATURES INCLUDE:

- Drag and drop emails or attachments from Outlook into SharePoint
- Drag and drop locally siloed files into SharePoint via Outlook
- Easily locate files in SharePoint from within Outlook via the AI.SYNCPOINT browse and search functionality
- Preview and edit files even while offline

WHY AI.SYNCPOINT?

AI.SYNCPOINT is trusted by a range of customers across the public sector from Local and Regional Government to Health. It helps them reduce the load on their infrastructure and improve document control by favouring cloud collaboration and eliminating the need to repeatedly duplicate and share attachments.
